6 reasons why businesses fail at customer acquisition

✗ Digital Marketing Is Overwhelming There are so many channels to advertise. It is just overwhelming to understand where to advertise.

✗ Marketing is Expensive – It is expensive to advertise on any channel. Cost per click is ridiculously high.

✗ Marketing Channels Are Not scalable – These channels and ad campaigns are not scalable.

✗ **Digital Marketing Is Unprofitable** – The sales produced from these leads are unprofitable and low value.

✗ **No ROI** – We get some leads but it is just not worth the ROI.

✗ **No Traction** – We simply cannot gain traction.

We're a digital marketing agency that believes every business has a MOAT. Every time we onboard a client, our first goal is to look at their product in every way imaginable.

We learn about their business, their product and their marketing team. We learn about what makes them unique. We research their online positioning.

Every product holds an intrigue that helps sell it to its audience. The job of every single digital marketing agency is to find that intrigue. There are more than a few hundred ways of describing that intrigue to your audience.
